# How to remove messenger home from android

How to remove messenger home on samsung. How do i remove messenger home from my android. How to uninstall messenger home on android.

Android phones from manufacturers like Samsung, Xiaomi, Realme, etc. Come uploaded with a series of system apps that you may not want to use. Still, they are eating useless resources on your device. Now, if you want to delete these pre-installed apps, don't worry, I covered you. Here are some simple ways to remove the pre-installed apps that the phone does not allow you to uninstall. Remove the apps that the phone does not allow you to uninstall I. Disable app in settings the easiest way to uninstall pre-installed apps or bloatware is to completely disable them, as follows. 1) On your Android phone, open the settings. 2) Go to app or manage applications and select all apps (may vary depending on the market and phone model). 3) Now, look for the apps you want to remove. Will you not find it? You can type your name in the search bar at the top. 4) Tap the name of the app and click Disable. Confirm when requested. This to. Once disabled, the app will disappear from your homescreen and the app drawer. Furthermore, it will no longer rush in the background or will eat useless space by collecting the cache. Some bloatware can be easily uninstalled as normal apps, while some must be disabled through previous steps. II. Can't uninstall an app set as an administrator? Some apps have the device administration permit and therefore you can't install easily. This is usually the case with antivirus, app lock and other apps that have granted the administrator permission of the device on your part. To remove these apps, you must revoke the authorization of the administrator, using the following steps. 1) Start the settings on your Android. 2) Head of the safety section. Here, look for the device administrators tab. 3) Touch the app name and reals Disable. Now you can uninstall the app regularly. III. Remove app via ADB (no root) The other option is to connect the phone to the computer and manually remove each application. Note that it is a bit boring and requires a fundamental level of computer knowledge. But then again, using the method, you can remove the apps that cannot be disabled on Android. 1. Enable USB debugging on the phone The first step requires you to enable USB debugging on the phone, to facilitate the ADB connection between the phone and the PC. 1] Open the settings on the phone and navigate to the phone section. 2] Here, it touches the number of builds or the version continuously seven times until you see the toasted message that says: "You are now in developer mode." 3] Back to settings. Do Click on System and select Developer Options. For some phones, this option is given in the section "Additional". 4] Flick the Toggle and activate the developer options. Now scroll down and enable USB debugging. 2. Connect your phone to the PC once the USB debugging is completed, you can connect the phone to the PC or on the laptop using a compatible USB cable. Make sure you select "File mode file transfer" from the notification pane. When prompted to "USB Debug USB", check the box next to "Allow". Then allow this computer to touch OK. 3. Install the ADB drivers on your computer if you didn't do it first, install the ADB drivers on your computer. You can download the package through these Windows links. A. Mac. B. Windows. C. Linux. Once ADB is installed, open the directory. Press SHIFT + right-click and select Open the PowerShell window here. Now, type "adb devices" and see if the name of your device code appears with its serial number in the next line. Enter the same code again to use the commands to uninstall the On your Android. 4. Use ADB commands to remove apps that have not won uninstallation can now use specific ADB commands to remove bloatware of your phone. The general code is "PM uninstall `package name`". For example, to remove the real app market on Realme phones, you need to type "pm uninstall `com.opo.market`". Similarly, to eliminate the Predefined oppo music app, you can use the command "pm uninstall `com.oppo.music`". However, we suggest you remain attentive to what you uninstall how the sensitive app removal could interrupt certain functions on the phone. By wrapping this was everything on how to remove the apps that have not easily uninstalled on your Android phone. Anyway, what method did you use? Have other tricks to add?
